- Fleas and ticks aren't just annoying, they suck your pet's blood!

- A heavy infestation can cause your pet to become anemic, putting them at risk of serious illness or death.

- Fleas and ticks also carry parasites and diseases such as tapeworm, E. Canis and Lyme disease.

- Some pets are allergic to fleas and can experience intense itching and hair loss.

- Prevention comes in the form of a tasty chewable treat! Ask us about the best solutions for your pet today.
